# 1. Introduction

United Memes Coin (\$UMC) is a Solana-based project that celebrates the wild, witty, and wonderful world of memes. The global meme culture unites people through humour and shared internet moments – now, we're bringing that energy onto the blockchain. \$UMC is powered by a robust community of meme enthusiasts who believe in the power of collaboration, collective laughter, and the potential for financial upside (with no guarantees, of course).

**The United Memes Coin is committed to:**

- **Fostering Creativity:** Through daily meme comics on our website, we encourage fun and user-generated content.
- **Empowering the Community:** A strong meme coin thrives on active supporters. We organize contests, airdrops, and collaborative endeavours where the community's voice counts.
- **Sustainability and Growth:** While we're playful at heart, we plan our tokenomics and roadmap carefully to balance community incentives, development, and marketing.
- **Transparent Engagement:** We keep our community informed of key events, presale details, and updates, ensuring fair processes and preventing unfair practices.

If you love memes, want to explore Solana's lightning-fast blockchain, and don't mind the inherent risks of crypto, \$UMC might be your next adventure.

## 2. Project Overview

### 2.1 Vision

We aim to bring all meme-driven communities together under a single comedic yet robust ecosystem. \$UMC fosters creativity and inclusivity, injecting fun into every step.

### 2.2 Key Features

- **Solana Ecosystem:** Benefit from low fees and near-instant transactions.

- **Dedicated Meme Comics:** Our website features daily meme stories, with characters reacting to crypto market ups and downs, turning each day into a comedic experience.
- **Lucky Supply:** A total of 8,888,888,888 \$UMC tokens, each with 8 decimals.

## 3. Tokenomics

\$UMC's tokenomics balance community rewards, development, and long-term sustainability:

### 1. Total Supply: 8,888,888,888

- This figure represents the complete, fixed number of tokens that will ever exist. It provides a clear cap, ensuring scarcity and forming the basis for the entire tokenomics model.

### 2. Decimals: 8

- With 8 decimals, \$UMC tokens can be subdivided into very small units (down to 0.00000001). This allows for precise transactions and facilitates micro-payments or fractional holdings, which is particularly useful as the token value changes over time.

### 3. Distribution:

- **Presale Allocation (30%):**  
30% of the total supply is dedicated to the presale. This portion is sold to early investors at a discounted rate, helping to generate initial funds, build community momentum, and kickstart the project's growth.
- **Community Airdrops & Rewards (20%):**  
20% is reserved for engaging and rewarding the community. These tokens are used for airdrops, contests, and other initiatives that incentivize participation and foster loyalty, ensuring that the community remains active and invested in the project's success.

- **Liquidity, DEX & CEX Listings (20%):**  
This allocation ensures that there is sufficient liquidity on both decentralized and centralized exchanges. By dedicating 20% of the supply to liquidity pools and exchange listings, the project aims to stabilize trading, reduce price volatility, and make it easier for users to buy and sell \$UMC tokens.
- **Marketing & Partnerships (15%):**  
15% of the tokens are set aside for marketing efforts and strategic partnerships. This fund is used to promote \$UMC, increase brand awareness, and secure collaborations with influential entities in the crypto space, which in turn helps drive adoption and value.
- **Team & Advisors (10%):**  
Tokens allocated to team and advisors will vest at a rate of up to 1% per month, starting immediately after the official DEX listing of the \$UMC token. This gradual release ensures long-term commitment and alignment with the project's sustained growth.
- **Reserve & Development (5%):**  
A small but crucial 5% of tokens is reserved for future development and ecosystem expansion. This reserve serves as a financial buffer for new initiatives, technological upgrades, and unforeseen opportunities that can enhance the project's long-term sustainability and innovation.

### 3.1 Presale & Token Release

- **Presale:** Early adopters can purchase discounted \$UMC.
- **Token Lockup:** Tokens remain locked until the presale ends, minimizing market manipulation.
- **Token Release:** As soon as the presale ends, tokens will become tradable for presale participants, ensuring fair access and eliminating front-running risks.

### 3.2 Transaction Fees

We strive for zero or minimal extra fees beyond Solana's standard network fee. Should a transaction tax for sustainability or token burn ever be introduced, the community will be informed well in advance.

## 4. Roadmap

### 1. Phase 1: Community & Foundation

- Launch official website and social channels.
- Commence daily meme stories.
- Establish core community presence on Telegram and X (Twitter).

### 2. Phase 2: Presale & Lock

- Conduct presale for early supporters.
- Freeze presale tokens to prevent unfair selling.
- Prepare liquidity plan and DEX/CEX listing strategy.
- Early Listing Incentive: If the presale reaches its goal, as displayed in our presale widget – the project may accelerate the DEX/CEX listing schedule, allowing for an earlier official launch and improved market liquidity.

### 3. Phase 3: Official Launch & Airdrops

- Permanently unfreeze tokens upon presale closure.
- Distribute airdrops to presale participants, contest winners, early community members, and select partners.

### 4. Phase 4: Exchange Listings & Partnerships

- List on popular Solana-based DEXs (Raydium, Jupiter, Orca, etc.).
- Pursue CEX listings to enhance liquidity and wider adoption.
- Expand marketing initiatives and partner with influential meme communities.
- Enrich daily meme comics with user-generated content.

### 5. Phase 5: Ecosystem Expansion

- Explore staking, yield farming, NFT collaborations, and potential philanthropic components.
- Maintain momentum in creative memes, daily stories, and community events.

## 5. Presale Participation

### 5.1 How It Works

- Stay tuned on official channels for presale dates and instructions.
- Purchase \$UMC at a discounted rate.
- Your presale tokens remain frozen until the presale ends.

### 5.2 After Presale

- Upon presale completion, token transfers will be unfrozen and \$UMC will be listed on DEX'es, allowing immediate trading for all presale participants.
- This reduces market manipulation and ensures a fair start.

### 5.3 Risks

- **Volatility:** The crypto market is famously unpredictable.
- **No Guarantees:** This is a meme-centric project and not a stable investment vehicle.
- **Regulatory Considerations:** Ensure compliance with your local laws before participating.

### 5.4 No Refunds

Due to the inherent nature of cryptocurrencies, all presale contributions are final and non-refundable.

## 6. Airdrops & Giveaways

We celebrate our community by sharing \$UMC through airdrops:

- **Who Qualifies?** Competitors in meme contests, loyal members, partner NFT holders, and more.
- **Distribution:** Airdropped tokens may also be subject to freeze periods if they coincide with the presale phase.
- **Announcements:** All details posted on our website and social media channels.

## 7. Disclaimer

\$UMC is a meme coin, implying speculative risk and market volatility. By participating, you acknowledge:

- Cryptocurrency investments can lose value rapidly.
- Nothing within this document or our communications is financial or legal advice.
- You should always DYOR (Do Your Own Research), consult professionals if needed, and comply with local regulations.

## 8. Risk Factors & Security

- **Market Volatility:** Fluctuations can be swift and unpredictable.
- **Regulations:** Laws differ by region; verify your compliance.
- **Smart Contract Bugs:** Although we prioritize testing, no code is infallible.
- **Scams/Phishing:** Only trust [umcoin.org](https://umcoin.org) and our verified social channels. Never share private keys.

We strongly recommend using reputable wallets, never sharing private keys, and enabling 2FA wherever possible.

## 9. Future Utility

\$UMC aspires to grow beyond memes:

- **Staking:** Potential passive rewards for holding a significant amount of \$UMC.
- **NFT Integrations:** Partnerships around daily meme stories or unique digital collectibles.
- **Charity:** Meme-driven donation campaigns to support various causes.

We remain open to additional community-driven features that enrich the \$UMC ecosystem.

## 10. Final Words from the Memeverse

United Memes Coin merges the power of meme culture with the robust capabilities of the Solana blockchain. Whether you're here purely for the comedic thrills or intrigued by the moonshot potential, we welcome you with a light-hearted spirit and remind you to stay prudent in your investments.

- **Stay Informed:** Never invest more than you can afford to lose.
- **Embrace the Fun:** After all, memes are meant to bring laughter and unity!
- **Engage with Us:** Share your memes, questions, and feedback.

Welcome to the world of \$UMC - let's meme our way to the stars!
